

REFLET: Scattering Measurements

Silver (Ag) Coating Measurement

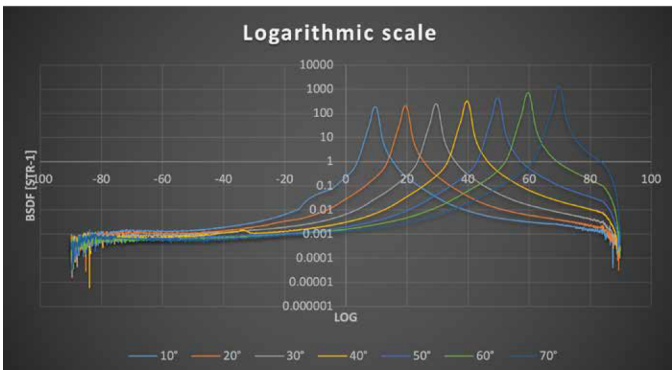

Sample: 50 x 50 mm plastic coated with an Ag film
 Source: Collimated white light, halogen lamp

Measurements done: One 3D scan for 30° incidence

Measurements done: 2D scan from 10° to 70° incidence angle

Measurements done: 2D scan from 10° to 70° incidence angle in a logarithmic scale

Ag coating sample
